Mrs. Judith Peters  
147 Ralston Ave.  
Havertown, PA 19083

Dear Mrs Peters:

Thanks for expressing your opinion on the proposed plan for the Havertown PCP site. EPA is planning to conduct additional testing east of Naylor's Run and we'll be developing a sampling plan which we feel will better define any possible contamination. To do this, we will select the locations which we believe will be the most representative. We will consider your area for testing.

As far as the National Wood Preservers is concerned, additional remedial actions will be taking place there, specifically with the soils. As we further examine National Wood Preservers, we will take any steps needed to protect public safety and health within the confines of the law.

Please contact me if you have any future questions.

Sincerely,

A handwritten signature in cursive script that reads "Jerome M. Curtin".
